This is to certify that

Testaccount

has completed the e-learning course

Cyber Security Awareness

on 29 November 2017

The participant has acquired a solid understanding of the requirements of Cyber Security for maritime IT and OT (Operational Technology) systems passing the final test of this course. During the e-learning course the participant learnt about the importance of personal behaviour as barrier against cyber-attacks.

The following subjects were covered in detail:

- Role of user in Cyber Security
- Common threats and traps
- Good practices towards cyber security

This e-learning is complying with TMSA 3 element 13 and 13.2.4 KPI/best practice and encourages responsible behavior by shore-based and vessel personnel towards:

- Locking of unattended work stations
- Safeguarding of passwords
- No use of unauthorised software
- Responsible use of social media
- Control/prevention of misuse of portable storage and memory sticks
